Description

Friends of Chiltern Park Newsletter No.4 October 1993

Dear Friends,

Thirty-two members, including nine junior members, met at Bartley's Brewery site in September. Once again the weather was perfect. Our guest for the meeting was Glen Johnson, Flora and Fauna Guarantee Officer from DCNR. On a walk through the park Glen helped us to identify the main plants and appreciate the different habitats as we walked through them. This record by one of our junior members sums up the activities of the day. Thank you Serena.

At our September meeting Glen from Wodonga came to show us different plants and areas around Bartley's and other places. I marked the list he gave me and I counted 39 different species. I hope I can remember some of them. After lunch we looked at more of the park, then drove to see the Regent honeyeaters. Mrs Collins had a cool telescope so we had an excellent view. Mrs. Collins also had a small magnifying lense that we used to look at all sorts of things, it was radical!!! It was an excellent day everyone had terrific time.

Sarina Walsh.

Further work on the weed Caper Spurge removed this season's seed heads. After an enjoyable lunch Glen showed a variety of reference books for identification of plants and animals. A comprehensive folder of record sheets for flora and fauna reports plus a selection of park maps has been provided for Friends to use.

From the meeting:

Next meeting date October 17th at Cyanide Dam. Wangaratta F.N.Club to join us.
December: BREAKFAST meeting, Sunday 5th, 8am Cyanide Dam.

January meeting to be a camp over, with evening tea. Activities : spotlight walk and stagwatch. Details later.

OCTOBER MEETING Cyanide Dam This gathering demonstrated how the skills of those present made the day profitable for everybody. The Wangaratta Field Nats combed the bush for special plants and helped people to identify the many pea flowers. Those who preferred manual labour eradicated Pepper trees, Thistles, Dock, Briar Rose and any other weed daring to be present. They were laid out and labelled by Patrick as an identification exercise. Recent heavy rain damaged the retaining rock wall at the dam outlet. This was repaired. Thanks to all who undertook these activities and to John for organising the "crew". The area around Cyanide Dam has been vastly improved by DCNR and the activities of Friends. Friends are encouraged to use their recognition skills to note locations of weed patches and record them for future spraying. If there are only a few plants they could be removed on the spot. Small Cootamundra Wattles, for example, are easily pulled out. After lunch a group went off to monitor some nest log sites, others went for a drive, some went to look at the Regent Honeyeater nest, the rest went for a bush walk. Inspection of the Genista Broom patch revealed numerous seedlings. These were removed. The site will need to be monitored until the end of November. Unfortunately another large patch has been located on the Howlong Rd. This will be sprayed by CNR. Friends will need to clean up the edges to remove all seedlings. Testimony to the warm day was the Red-bellied Black snake basking in the drain on Cyanide Road. Very active were the Bulldog Ants that

made life uncomfortable for Patrick and Jesse. Many birds were easily observed around the dam, Treecreepers and Yellow Robins were almost tame and an Olive-backed Oriole chose a branch overhanging the entrance track in which to build its nest.

From the meeting

1. The account for the Wildflower books has been paid in full.
2. Two diaries and one large wildflower book remain to be sold.
3. Next meeting Saturday November 13 at Bartley's with lunch at Valley No.2 Dam.
4. Congratulations were extended to Glen Johnson and Maria on the birth of Tessa Louise
5. Barnawartha Landcare group hope to plant a large number of trees in the autumn. Members agreed to offer assistance. The trees will form corridors from the Park to the Murray River flats.
6. Nest Logs: Volunteers to do inspections before the November meeting please contact me.
7. Bruce Quin extends his thanks to all who assisted with the nest log project.
8. Frog Talk. Ivor Graney will present a "slide and calls" show at The Centre in Wangaratta during February or March. If you wish to learn more about frogs keep this talk in mind. Details later.

Thanks to all who attended the September and October gatherings. Hope to see you all at BARTLEY'S on SATURDAY NOVEMBER 13TH at 9.00am where we will keep up the good work.

STOP PRESS:

Grey-crowned Babblers have been seen in the park close to the Ryans Rd/Howlong Rd intersection. This bird is threatened with extinction in Victoria. Eileen.

NOTES From Victorian National Parks Association's Fence Project

Launch at Koonda Flora Reserve, near Violet Town. A workshop to acquire fencing skills and to set up fencing volunteer network. If you are interested in fencing and conservation of remnant native vegetation this could be for you. Details 057 261 484

From Minister Conservation and Environment :

Volunteer Work in National Parks Attention Tertiary Students: If you are interested in volunteer work during the summer holiday the National Parks Service staff have created a wide range of activities. The only cost involved is \$40 as a contribution towards food. Please ring 057 261 484 for further details.

Interesting Birds from September/October meetings

Turquoise parrot Restless Flycatcher Pallid cuckoo Musk Lorikeet Mistletoe-bird Grey Fantail

Noisy Friar-bird Little Friar-bird Brown flycatcher Olive-backed Oriole White-browed Babbler

Black-chinned Honeyeater White-naped Honeyeater Regent Honeyeater Peaceful Dove

Rufous Songlark Little Cuckoo-shrike Swift Parrot {September} Diamond Firetail

Interesting Plantsâ??October

Showy Podalepis Hooded Caladenia Yellow Wedge-pea Twining Fringe-lily

Salmon Sun-orchids Cupped Bush-pea Showy Parrot-pea Narrow-leafed Bitter-pea

Austral Indigo Austral Grass-tree, in flower on the Cyanide Dam walking track.

Useful Reference Books for Flora and Birds

Field Guide to the Native Peas, Dorothy Woolcock. Anyone wishing to purchase this may like to contact me as I may be able to get them at a substantially reduced price.
